

**RAPID COVID-19 ANTIGEN TEST CONSENT FORM**

**This consent form certifies that you understand and agree with the following:**

- I certify that I am at least 18 years of age and that I may be required to show a valid government issued photo identification in order to receive this service.

**Procedure & Risk**

- The WLNSS test is the BD Veritor System for Rapid Detection of SARS-CoV-2.
- This tests for the detection of active viral infection of COVID-19.
- A WLNSS provider inserts a simple cotton swab one inch into each nostril. The swab is rolled 5 times along the inside of the nostril to ensure that both mucus and cells are collected.
- Results are received in 15 minutes.
- This rapid antigen test has a sensitivity of 84% and a specificity of 99%.
- **Positive Test** - Positive results indicate the presence of viral antigens, but clinical correlation with patient history and other diagnostic information is necessary to determine infection status. Positive results do not rule out bacterial infection or co-infection with other viruses. The agent detected may not be the definite cause of disease.
- **Negative Test** - Negative results do not rule out SARS-CoV-2 infection and should not be used as the sole basis for treatment or patient management decisions, including infection control decisions. Negative results should be considered in the context of a patient’s recent exposures, history, and the presence of clinical signs and symptoms consistent with COVID-19, and confirmed with a molecular assay, if necessary, for patient management.
- Test results information collected by WLNSS providers is not reported to any entity. WLNSS providers simply read the results as they appear on screen of the BD Veritor Analyzer. It is up to the individual tested whether to share their results information with their physician.
- Medical services are provided by Yen Tun Wang Medical Services Corporation. This COVID-19 antigen test has been authorized by the Food and Drug Administration under an Emergency Use Authorization for use by authorized laboratories. This product is not intended to diagnose, treat, cure, or prevent any disease. The material on WLNSS’s website ([www.wlnss.co](http://www.wlnss.co)) is provided for informational purposes only and is not medical advice.
